

Cancer Rehabilitation 4 Qualified Instructor

Role Description

Programme overview

A cancer diagnosis and treatment can make people feel isolated and alone, with little energy and feeling low. The advice used to be that rest was best, however research shows that moving more can actually help with recovery and makes you feel better. For people affected by cancer, benefits of participation in physical activity include decreased fatigue, increased physical functioning and improved wellbeing. Regular physical activity may even reduce the chances of some cancers coming back.

Macmillan Cancer support are working with **enjoyleisure** and East Lothian Council to deliver the Move More East Lothian programme. From walking groups, gardening to small group circuits and gentle movement classes, there is something for everyone.
